

SQL Server Scripted-Out Object Listing

<https://github.com/gwalkey>

1. Server
 - a. Logins – without the passwords of course
 - b. Roles
 - c. Server Settings/HW-SW/Shares/Storage/Mount-Points
 - d. Linked Servers
 - e. DB Mail Accounts/Profiles
 - f. NT Service Startup Credentials
 - g. Server Triggers
 - h. Server Credentials (Azure)
 - i. Audits
 - j. Resource Governor Pools and Workgroups
 - k. Instance Startup Procedures (in Master DB)
2. SQL Agent
 - a. Agent Jobs/Alerts/Schedules/Proxies/Operators
3. Database
 - a. Tables
 - i. Columns (Create Table format, Constraints)
 - ii. Indexes (Create Index, Filters)
 - iii. Referential Integrity (with Alter Table-References)
 - iv. Triggers (Create Trigger)
 - v. Partition Schemes/Functions
 - b. Views
 - c. Schemas
 - d. Stored Procedures
 - e. User Defined Types
 - f. User Defined Functions
 - g. Full Text Catalogs
 - h. Filegroups
 - i. Database Triggers
 - j. .NET Assemblies
 - k. Managed Backups
 - l. Synonyms
4. SSIS
 - a. Packages in MSDB – in DTSX format
 - b. Packages in SSISDB Catalog in Project/Folder/Package structure - in ISPAC format
 - c. SSISDB Master Encryption Key
5. SSAS
 - a. Multi-Dimensional Databases (Cubes, Dimensions, Facts, KPI) - in XMLA format
 - b. Tabular Databases - in XMLA format
6. SSRS
 - a. SSRS Master Encryption Key
 - b. Reports - in RDLC format
 - c. Timed Subscriptions
 - d. RSReportServer config file
 - e. Server Settings
 - f. Folder and Report Security
7. Service Broker
 - a. Contracts/Messages/Queues/Routes

SQL Server Scripted-Out Object Listing

8. PKI (Service Master Key, Database Master Key, Asym Keys, Sym Keys, Certificates)
